Deepanshu Chauhan

Security Researcher | Cloud & Infrastructure Engineer | Aspiring Cloud Security Engineer

Bengaluru, Karnataka | deepanshu.infosec@gmail.com | linkedin.com/in/su6osec | github.com/su6osec

Professional Summary

Security-focused engineer with a web application security and bug bounty background, paid vulnerability disclosures, and experience building OSINT reconnaissance tooling in Go. Works full-time in enterprise infrastructure (CMDB, ITSM, service modelling) on a global client account, which grounds security work in how real environments are inventoried and run. Working toward a Cloud Security Engineering path covering IAM, DevSecOps and offensive security.

Skills

Application Security: Web Application Security, Vulnerability Analysis & Validation, Manual Dynamic Testing (Burp Suite), Bug Bounty Hunting, OSINT & Reconnaissance, Attack Surface Mapping, Cloud Security Fundamentals

Development & Automation: Go, Python (basic), Bash, PowerShell (basic), Git/GitHub

Security Tooling: Burp Suite, Nmap, Wireshark, Metasploit, Kali Linux, Parrot OS

Cloud & Infrastructure: Microsoft Azure, AWS, GCP, Linux, Windows Server, Active Directory, Networking Fundamentals

IT Service Management: BMC Helix ITSM, BMC Remedy, CMDB Administration & Reconciliation, Configuration Item (CI) Management, Service Modelling, Incident Management, ITIL Fundamentals

Security Research & Achievements

- **Bug Bounty:** Received rewards from Liquid Web and Zoho for responsibly disclosed vulnerabilities; Certificate of Appreciation from ACT Fibernet.
- **Open Source:** Published *Bug-Bounty-Hunting-Methodology-2026* on GitHub, documenting a structured approach to recon and vulnerability hunting.
- **Tooling:** Built Graphite, a Go-based subdomain recon tool aggregating 39 OSINT sources with validation to reduce false positives (no longer maintained).
- **TryHackMe:** Ranked in the top 5% of performers globally.
- **CTF:** Participant, BSides 0x01 College CTF.

Professional Experience

Engineer – Cloud & Infrastructure Management **Nov 2025 – Present**

LTM (formerly LTIMindtree)

- Administer and maintain the CMDB for an enterprise client account with admin-level access: Configuration Item (CI) creation, updates, and reconciliation in BMC Helix ITSM, keeping asset and configuration data accurate.
- Build service models and update forms in Remedy as part of Hardware Asset Management and service modelling.
- Previously supported incident management, service desk and deskside support, troubleshooting infrastructure issues across Windows Server environments.
- Progressed through structured rotations — induction training, CIS support, and FMB Service Desk/Deskside Support — before being placed on the current enterprise account.

Certifications

- Google Cybersecurity Professional Certificate
- Cybersecurity in the Cloud — Coursera
- Claude Certified Architect – Professional

Education

Bachelor of Computer Applications (BCA) **Jun 2025**

Graphic Era University, Dehradun, India
