📍 Bangalore, India | 📞 +91 93682 89846 | ✉️ deepanshu.infosec@gmail.com | 🔗 linkedin.com/in/su6osec | 🐙 github.com/su6osec

Cloud & Infrastructure Engineer building a dual-track foundation in enterprise cloud operations and offensive security, with a long-term goal of transitioning into a dedicated **Cybersecurity Engineering** or **Security Operations** role. Proficient in **penetration testing, bug bounty hunting, OSINT, vulnerability assessment, and threat-driven reconnaissance**. Google-certified cybersecurity practitioner, **TryHackMe global top 5%**, and author of **2 production-grade open-source offensive security tools** in Go. Earned **\$350+ in bug bounty rewards** through responsible disclosure to globally recognised organisations.

TECHNICAL SKILLS

Cybersecurity Penetration Testing, Web Application & API Security, Bug Bounty Hunting, OSINT, Vulnerability Assessment & Reporting, Responsible Disclosure, Threat Detection, Reconnaissance Automation, Attack Surface Mapping, Incident Response

Cloud & Infrastructure Microsoft Azure, Linux (Ubuntu/RHEL), Windows Server, Active Directory, VMware/Hyper-V, TCP/IP, DNS, DHCP, Access Management, Patch Management, ITSM

Security Tools Burp Suite Pro, Nmap, Metasploit, Nuclei, Subfinder, Httpx, Wireshark, OWASP ZAP, Shodan, Git

Programming Go (Golang), Python, Bash/Shell Scripting, PowerShell, SQL

Frameworks & Standards OWASP Top 10, MITRE ATT&CK, CIS Benchmarks, NIST CSF, Zero Trust Architecture, ITIL v4

PROFESSIONAL EXPERIENCE

LTM

Nov 2025 – Present

Engineer, Cloud & Infrastructure Management (CIS)

Bangalore, India

- Administer and monitor **cloud and on-premises infrastructure** within the CIS domain, upholding availability, **security posture**, and operational compliance across hybrid enterprise environments.
- Process **ITIL v4-aligned service requests** — access provisioning/deprovisioning, patch deployment, and P1/P2 incident resolution — ensuring strict adherence to defined SLA parameters and change management policies.
- Author **technical runbooks, incident reports, and compliance documentation** to support audit readiness, risk governance, and knowledge continuity across operations teams.

OPEN-SOURCE SECURITY PROJECTS

Graphite — Subdomain Reconnaissance Engine

Go | Apr 2026

- Architected a **high-throughput subdomain enumeration CLI** in Go, aggregating **39 passive OSINT sources** via concurrent goroutine querying with deterministic deduplication and **zero false positives** — purpose-built for structured bug bounty and penetration testing pipelines.
- Shipped as a **cross-platform static binary** (Linux, macOS, Windows) with structured JSON/text output, enabling direct pipeline integration with Nuclei, Httpx, and custom offensive toolchains.

OSCAR — Omni-Signal Capture & Agentic Recon

Go | Apr 2026

- Designed a **production-grade bug bounty recon framework** with a **5-stage automated pipeline**: asset discovery → service fingerprinting → vulnerability detection → AI-assisted triage via local Ollama LLM — significantly reducing manual analysis overhead.
- Delivered as a **single cross-platform binary** enabling end-to-end automated target profiling across web, API, and cloud attack surfaces without external runtime dependencies.

BUG BOUNTY & RESPONSIBLE DISCLOSURE

- Awarded **\$300 by Liquid Web** for identifying and responsibly disclosing a medium-severity vulnerability; issue confirmed, triaged, and fully remediated by the vendor security team.
- Awarded **\$50 by Zoho** for uncovering a **hardcoded API key** exposing internal service credentials; coordinated disclosure patched within vendor-defined reporting SLA.
- Maintained **100% report acceptance rate** across public and private programs — all submissions validated, rewarded, and resolved, reflecting precise and reproducible vulnerability documentation.

EDUCATION

Graphic Era Hill University, Dehradun

Sep 2022 – Jun 2025

Bachelor of Computer Applications (BCA), Industry-Integrated

Relevant Coursework: Data Structures & Algorithms, Web Security, Operating Systems, DBMS, Computer Networks, Linux Administration

CERTIFICATIONS

- Google Cybersecurity Professional Certificate — Google / Coursera
- Professional Machine Learning Engineer — Google Cloud
- Offensive Penetration Testing — Cybrary

Jul 2025
Jul 2024 – Jul 2026
Oct 2023
